

FULLSTACK DEVELOPMENT – DAY 2 SUMMARY

TODAY COVERED TOPICS:

- ❖ INTRODUCTION OF JAVA
- ❖ OVERVIEW OF PROGRAMMING LANGUAGE
- ❖ TYPES OF PROGRAMMING LANGUAGE
- ❖ HISTORY OF JAVA
- ❖ WHY WE LEARN JAVA

➤ INTRODUCTION OF JAVA:

Java is a truly Object Oriented Programming Language . Java was created by James Gosling and his team SunMicrosystem in 1991. Java's old name was Oak and later renamed as Java in 1995(Oracle). Java is a reusable , Secure and Platform Independent . Java have core principle "Write Once, Run Anywhere".

➤ OVERVIEW OF PROGRAMMING LANGUAGE:

Programming language is a communication between human and Machine.

➤ TYPES OF PROGRAMMING LANGUAGE:

- Low Level Language - Assembly Code (Mnemonic code) , Chips.
- Medium Level Language - C,C++.
- High Level Language – Java , Python.

➤ HISTORY OF JAVA :

- 1991- Java created by James Gosling . language is called Oak.
- 1995 – later rename as Java.
- 2014- every six month cycle to update the version.
- Latest version of Java is 26.
- Java include JDK,JRE and JVM.

➤ WHY WE LEARN JAVA:

Java is a robust , Secure and Platform Independent. And we use java in many apps like android, Web Application , Finance and Banking, etc,.....
