

FULLSTACK DEVELOPMENT -DAY 4 SUMMARY

TODAY COVERED TOPIC : UNIT -2

- ❖ STRUCTURE OF JAVA PROGRAM
- ❖ SYNTAX RULES
- ❖ COMMENTS
- ❖ DATATYPES
- ❖ TYPES OF DATATYPES
- ❖ VARIABLE
- ❖ RULES FOR NAMING VARIABLES

➤ STRUCTURE OF JAVA PROGRAM:

```
public class HelloWorld
{
    public static void main(String[] args)
    {
        system. out. println ("Hello,World");
    }
}
```

➤ SYNTAX RULES:

- Every statement ends with semicolon.
- Curly braces{} in block of code.
- Class name starts with Uppercase.
- File name must match with Class name.
- Methods & Variables starts with lowercase.
- Java is a Case-sensitive.

➤ COMMENTS:

Comments is used to convey information or explanation of code .

Types of Comments:

- Single Line Comment → //
- Multi Line Comment → /* */

➤ DATATYPES:

Data type is used for what kind of value variable can store and how much memory it will take. Data is a collection of information.

Uses of Data type:

- Allocate proper memory for variables.
- Operation can perform on data.
- Prevent error.

➤ Types of Data Types:

1. Primitive Datatype
2. Non-Primitive Datatype

1. Primitive Datatype:

Primitive datatype has 8 datatypes

- Int – 4 bytes
- Float – 4 bytes
- Long – 8 bytes
- Double – 8 bytes
- Short – 2 bytes
- Char – 2 bytes
- Boolean – 1 bit
- Byte – 1 byte

2. Non-Primitive Datatype:

Non-Primitive Datatype has a 5 datatypes

- String
- Array
- Class
- Object
- Interface

➤ FUNCTION:

Function is a word followed by Parathesis() is called function. its also called Method or behaviour.

➤ VARIABLES:

Variables is a containers in computer that store data or information. Variables is also known also attributes or Data).

✓ SYNTAX:

Datatype VariableName = value;

Int age =20;

✓ TYPES OF VARIABLE:

Local variable – it call method inside.

Instances Variable – Object Call

Static Variable – Static keyword to declared

➤ RULES FOR NAMING VARIABLES

- Variable name must start with a letter ,\$, or _.
- Variable names cannot starts with a number.
- Variables names cannot have spaces.
- Variables names cannot have java keyword like class,int,static.
