

DATATYPE PROGRAM:

```
package javaprograms;

public class Datatype {

    public static void main(String[] args) {

        int age =25;

        float num = 25.7f;

        double salary = 250000.00;

        short year = 2026;

        long hospitals = 50000000L;

        char grade = 'B';

        boolean isJavaSecure = true;

        String name = "Porselvi";

        System.out.println("Age:"+age);

        System.out.println("Num:"+num);

        System.out.println("Salary:"+salary);

        System.out.println("Year:"+year);

        System.out.println("Hospitals:"+hospitals);

        System.out.println("Grade:"+grade);

        System.out.println("isJavaSecure:"+isJavaSecure);

        System.out.println("Name:"+name);

    }

}
```

VARIABLE PROGRAM:

```
package javaprograms;

public class Variables {

    public static void main(String[] args) {

        int $price = 50;

        String Product = "Soap";

        System.out.println("$price:"+$price);

        System.out.println("Product:"+Product);

    }

}
```

}

}
